Overview

The HP StoreFabric SN1000 16Gb Host Bus Adapters are designed to support ProLiant Servers with PCI-Express I/O slots to connect to HP Storage Arrays using the 16/8/4 Gb Fibre Channel protocol.

The HP SN1000 16Gb Host Bus Adapters bring datacenter infrastructure components to a higher level of performance and efficiency with the ability to deliver twice the I/O performance of 8Gb HBAs. A 16Gb FC HBA purchased today is backward compatible with 8 and 4 Gb storage networks and will protect future investments. When using storage intensive applications, such as backup/restore, database transactions, virtualization, and rich media, the increased performance of the 16 Gb infrastructure enables more rapid storage and retrieval of critical information. Designed for environments with greater virtual machine density and bandwidth requirements, the SN1000 16Gb HBAs enable more applications and VMs to run on a single server and Fibre Channel port, resulting in reduced cabling and a higher return on IT investment

What's New
- HP SN1100E 16Gb Single-Port Fibre Channel Host Bus Adapter (C8R38A)
- HP SN1100E 16Gb Dual-Port Fibre Channel Host Bus Adapter (C8R39A)

Key Features and Benefits

Performance	Delivers, up to six times the IOPS, twice the data throughput (MB/s) and cuts latency by half compared to 8Gb FC HBAs

- Best Fibre Channel IOPS, latency and throughput performance enables increased application and database transactions per second, enables faster large block transfers and increases the number of VMs that can be supported per server.

Support for greater Server Virtualization   Ideal for high density server virtualization environments

- Enables more applications and VMs to run on a single server and Fibre Channel port, resulting in reduced cabling and a higher return on IT investment

Provides HP ProLiant Connectivity to Storage And Network   Robust interoperability testing

- Provides an HP-branded HBA solution which has undergone extensive HP interoperability testing for connecting HP ProLiant servers into storage and networking environments.
- Optimal for connecting to HP's16Gb FC edge/core network switches.

Improved IOPS performance per watt   Power savings result in lower Operating expenditure.
